

# TS-QP-P3140-10DC

# 40G QSFP+ 10km PSM4 Transceivers

#### **Features**

- MPO-12 optical interface
- Maximum link length up to 10km
- Up to 10.3125Gb/s data links per lane
- +3.3 V power supply
- QSFP MSA compliant package
- Hot Pluggable
- High performance singal mode DML transmitter
- High sensitivity PIN/TIA optical receiver
- Single Mode operation
- Case Operating temperature : 0 to 70°C
- Data and Control Interfaces
- Tx Data CML/AC Coupled
- Rx Data CML/AC Coupled
- ModSelL LVTTL
- ResetL LVTTL
- ModPrsL LVTTL
- LPMode LVTTL
- 2-wire I2C communication bus
- RoHS 6 compliance

### **Applications**

- 40G BASE Ethernet
- Infiniband EDR interconnects
- Enterprise networking

### **Product Description**

The TS-QP-P3140-10DC QSFP+ PSM4 optical transceiver is intended for up to 10km reach service with four-lane 10.3125G data rate. It is based on 3.3V DC power supply and operates in the Commercial temperature range. It is compliant with QSFP MSA SFF-8436 and IEEE802.3ba-2018. Digital diagnostic functions are available via 12C interface, and the control functions can be achieved

by LVTTL interfaces on the host, mainly including Module Select(ModSelL). Module Reset(ResetL). Low Power Mode(LPMode). The transceiver incorporates a four-laser array which is usually DFB. four-PIN diode array. an integrated four drivers and TIAs IC separately. The differential AC coupled Tx and Rx data interfaces are CML compatible.

### **Ordering Code**

Ordering Information					
Part Number Case Operating Temperature					
TS-QP-P3140-10DC	0 to 70 °C				

### **Absolute maximum parameters**

Absolute Maximum Ratings (EXCEEDING THESE RATINGS MAY CAUSE IRREVERSIBLE DAMAGE TO THE DEVICE)									
Parameter	Symbol	Min	Max	Units	Notes				
Storage Temperature	T <sub>stg</sub>	-40	+95	°C	Exceeding the absolute				
Case Operating Temperature (Commercial)	To	0	70	°C	maximum ratings may cause irreversible damage to the device.				
Relative Humidity - Storage	R <sub>HS</sub>	0	95	%	The device is not intended to				
Relative Humidity - Operating	R <sub>HO</sub>	0	85	%	be operated under the condition				
Supply Voltage	VCC	-0.3	3.6	V	of simultaneous absolute maximum rat- ings, which may cause irreversible damage to the device.				

# **Operating conditions**

Recommended Operating Conditions							
Parameter Symbol Min Typ Max Units No							
Case Operating Temperature	T <sub>case</sub>	0	-	+70	°C		
DC Supply Voltage	VCC	3.135	-	3.465	V		
Module Supply Current	l <sub>in</sub>	-	-	1060	mA		

### **Electrical Characteristics**

Transmitter Electrical Characteristics									
Parameter Symbol Min Typ Max Units Note									
Differential Data input Swing	V <sub>in</sub>	180	-	900	mV				
Tx Differential Input Impendence	Z <sub>in</sub>	90	100	110	Ω				
Tx Differential Output Impendence	Z <sub>out</sub>	45	50	55	Ω				

ResetL Disable Voltage	Vr	2.0	-	Vcc+0.3	V			
ResetL Enable Voltage	$V_{rEN}$	0	-	0.8	V			
ModSelL Disable Voltage	V <sub>m</sub>	2.0	-	Vcc+0.3	V			
ModSelL Enable Voltage	$V_{mEN}$	0	-	0.8	V			
Receiver Electrical Characteristics								
Davamatav								
Parameter	Symbol	Min	Тур	Max	Units	Notes		
Differential Data Output Swing	V <sub>out</sub>	<b>Min</b> 180	Typ -	<b>Max</b> 900	<b>Units</b> mV	Notes

# **Optical Specification**

Transmitter Optical Specification						
Parameter	Symbol	Min	Тур	Max	Units	Notes
Signal Rate  <sub>Each Lane</sub>			10.3125 ±100pp m		Gbps	
	L0	1295	1310	1325	nm	
	L1	1295	1310	1325	nm	
Lane Wavelength	L2	1295	1310	1325	nm	
	L3	1295	1310	1325	nm	
Side Mode Suppression Ratio	SMSR	30			dB	
Average Launch Power  <sub>Each Lane</sub>	P <sub>avg</sub>	-7		2.5	dBm	
Optical Modulation Amplitude  <sub>Each Lane</sub>	OMA			2.5	dBm	1
Transmitter and dispersion penalty Each Lane	TDP			2.6	dB	
Eye Mask coordinates: X1, X2, X3, Y1, Y2, Y3		{0.25, 0.4, 0.45, 0.25, 0.28, 0.4}				
Average launch power of OFF transmitter  <sub>Each Lane</sub>				-30	dBm	
Extinction Ratio	ER	3.5			dB	
Spectral Width  <sub>20dB</sub>				1	nm	
Transmitter Reflectance				-12	dB	
Optical return loss tolerance				20	dB	_

#### Note:

- 1. Even if the TDP < 0.8dB, the OMA min must exceed the minimum value specified here.
- 2. Hit ratio@ 5e-5, per IEEE.

### **Receiver Optical Specification**

Davamatav	Complete	NA:	T	Mari	11:0:40	Natas
Parameter	Symbol	Min	Тур	Max	Units	Notes
Signal Speed Per Lane			10.3125±		Gbps	
			100ppm			
	L0	1295	1310	1325	nm	
Lane Wavelength	L1	1295	1310	1325	nm	
Lane wavelengin	L2	1295	1310	1325	nm	
	L3	1295	1310	1325	nm	
Damage threshold  <sub>Each Lane</sub>	THd	2.5			dBm	1
Average Receive Power Each Lane		-12.6		2	dBm	
Receiver reflectance				-26	dB	
Sensitivity OMA Each Lane[1]	Sen1			-12	dBm	2
Stressed Receiver Sensitivity				-8.6	dBm	
(OMA), each Lane						
LOS Assert	LOSA	-30	-		dBm	
LOS Deassert	LOSD			-17	dBm	
LOS Hysteresis	LOSH	0.5		5	dB	
Vertical Eye Closure Penalty	VECP	1.9			dB	3
Stressed Eye J2 Jitter	J2	0.3			UI	
Stressed Eye J4 Jitter	J4	0.47			UI	

#### Note:

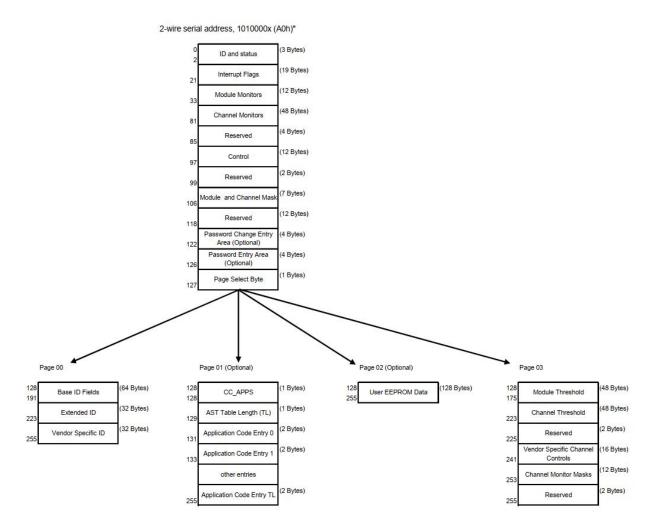

- 1. The receiver shall be able to tolerate, without damage, continuous exposure to a modulated optical input signal having this power level on one lane. The receiver does not have to operate correctly at this input power.
- 2. Measured with conformance test signal at receiver input for BER = 1e-12.
- 3. Vertical eye closure penalty and stressed eye jitter are test conditions for measuring stressed receiver sensitivity. They are not characteristics of the receiver.

## **Digital diagnostic**

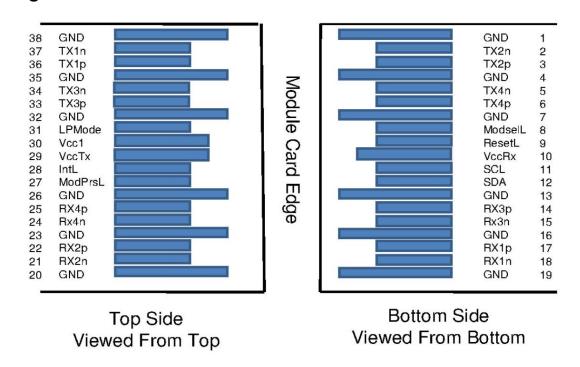

Monitoring Interface							
Parameter	Symbol	Spec	Units	Condition/Notes			
Temperature	Те	+/-3	°C				
Voltage	VCC	+/-5%	V				
IBias	BIAS	+/-10%	mA				
Rx power	Rx-pwr	+/-2	dBm				
Tx power	Tx-pwr	+/-2	dBm				

# **Memery Map**

### **PIN Assignment**

	PIN Description						
PIN	Symbol	Name/Description	Note				
1	GND	Ground	1				
2	Tx2n	Transmitter Inverted Data Input					
3	Tx2p	Transmitter Non-Inverted Data output					
4	GND	Ground	1				
5	Tx4n	Transmitter Inverted Data Input					
6	Tx4p	Transmitter Non-Inverted Data output					
7	GND	Ground	1				
8	ModSelL	Module Select					
9	ResetL	Module Reset					
10	VccRx	+3.3V Power Supply Receiver	2				
11	SCL	2-Wire Serial Interface Clock					
12	SDA	2-Wire Serial Interface Data					
13	GND	Ground	1				
14	Rx3p	Receiver Non-Inverted Data Output					
15	Rx3n	Receiver Inverted Data Output					
16	GND	Ground	1				
17	Rx1p	Receiver Non-Inverted Data Output					
18	Rx1n	Receiver Inverted Data Output					
19	GND	Ground	1				
20	GND	Ground	1				
21	Rx2n	Receiver Inverted Data Output					
22	Rx2p	Receiver Non-Inverted Data Output					
23	GND	Ground	1				
24	Rx4n	Receiver Inverted Data Output					
25	Rx4p	Receiver Non-Inverted Data Output					
26	GND	Ground	1				
27	ModPrsL	Module Present					
28	IntL	Interrupt					
29	VccTx	+3.3 V Power Supply transmitter	2				
30	Vcc1	+3.3 V Power Supply	2				
31	LPMode	Low Power Mode					
32	GND	Ground	1				
33	Tx3p	Transmitter Non-Inverted Data output	<u> </u>				
34	Tx3n	Transmitter Inverted Data Input					
35	GND	Ground	1				
36	Tx1p	Transmitter Non-Inverted Data output	<del> </del>				
37	Tx1n	Transmitter Inverted Data Input	+				
38	GND	Ground	1				
	טואט	Ground					

Notes1:GND is the symbol for signal and supply (power) common for the QSFP module. All are common within the QSFP+ module and all module voltages are referenced to this potential unless otherwise noted. Connect these directly to the host board signal-common ground plane.

Note 2: Vcc Rx, Vcc1 and Vcc Tx are the receiver and transmitter power supplies and shall be applied concurrently. Requirements defined for the host side of the Host Edge Card Connector are listed.

Recommended host board power supply filtering is shown in Figures 3 and 4. Vcc Rx Vcc1 and Vcc Tx may be internally connected within the QSFP+ Module in any combination. The connector pins are each rated for a maximum current of 500 mA

#### ModSelL

The ModSelL is an input pin. When held low by the host, the module responds to 2-wire serial communication commands. The ModSelL allows the use of multiple QSFP modules on a single 2-wire interface bus. When the ModSelL is "High", the module shall not respond to or acknowledge any 2-wire interface communication from the host. ModSelL signal input node must be biased to the "High" state in the module. In order to avoid conflicts, the host system shall not attempt 2-wire interface communications within the ModSelL de-assert time after any QSFP modules are deselected. Similarly, the host must wait at least for the period of the ModSelL assert time before communicating with the newly selected module. The assertion and de-asserting periods of different modules may overlap as long as the above timing requirements are met

#### ResetL

The ResetL pin must be pulled to Vcc in the QSFP module. A low level on the ResetL pin for longer than the minimum pulse length (t\_Reset\_init) initiates a complete module reset, returning all user module settings to their default state. Module Reset Assert Time (t\_init) starts on the rising edge after the low level on the ResetL pin is released. During the execution of a reset (t\_init) the host shall disregard all status bits until the module inidicates a completion of the reset interrupt. The module indicates this by posting an IntL signal with the Data\_Not\_Ready bit negated. Note that on power up (including hot insertion) the module should post this completion of reset interrupt without requiring a reset.

### **ModPrsL**

ModPrsL is pulled up to Vcc\_Host on the host board and grounded in the module. The ModPrsL is asserted "Low" when inserted and deasserted "High" when the module is physically absent from the host connector

#### IntL

IntL is an output pin. When "Low", it indicates a possible module operational fault or a status critical to the host system. The host identifies the source of the interrupt using the 2-wire serial interface. The IntL pin is an open collector output and must be pulled to host supply voltage on the host board.

#### **LPMode**

The LPMode pin shall be pulled up to Vcc in the QSFP module. This function is affected by the LPMode pin and the combination of the Power\_over-ride and Power\_set software control bits (Address A0h, byte 93 bits 0,1). The module has two modes a low power mode and a high power mode. The high power mode operates in one of the four power classes.

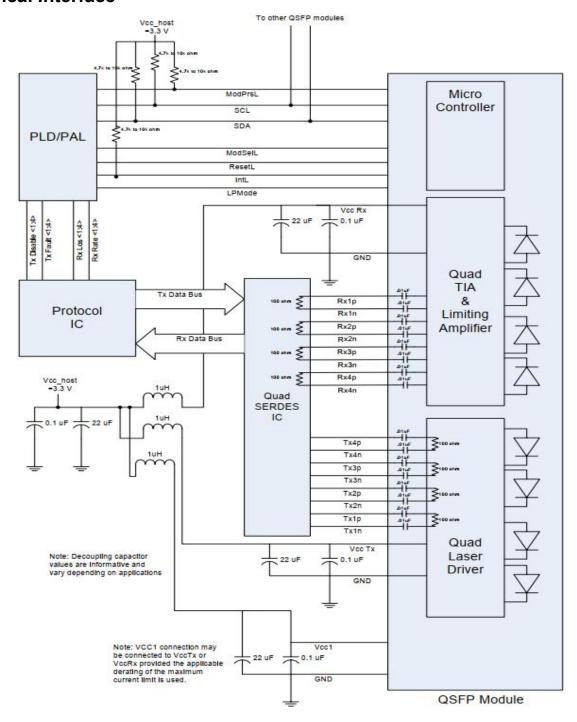

When the module is in a low power mode it has a maximum power consumption of 1.5W. This protects hosts that are not capable of cooling higher power modules, should such modules be accidentally inserted.

The modules 2-wire serial interface and all laser safety functions must be fully operational in this low power mode. The module shall still support the completion of reset interrupt in this low power mode. If the Extended Identifier bits (Page 00h, byte 129 bits 6-7) indicate a power consumption greater than 1.5W and the module is in low power mode it must reduce its power consumption to less than 1.5W while still maintaining the functionality above. The exact method of accomplishing low power is not specified, however it is likely that either the Tx or Rx or both will not be operational in this state. If the Extended Identifier bits (Page 00h, byte 129 bits 6-7) indicate that its power consumption is less than 1.5W then the module shall be fully functional independent of whether it is in low power or high power mode.

The Module should be in low power mode if the LPMode pin is in the high state, or if the Power\_over-ride bit is in the high state and the Power\_set bit is also high. The module should be in high power mode if the LPMode pin is in the low state, or the Power\_over-ride bit is high and the Power\_set bit is low. Note that the default state for the Power\_over-ride bit is low.

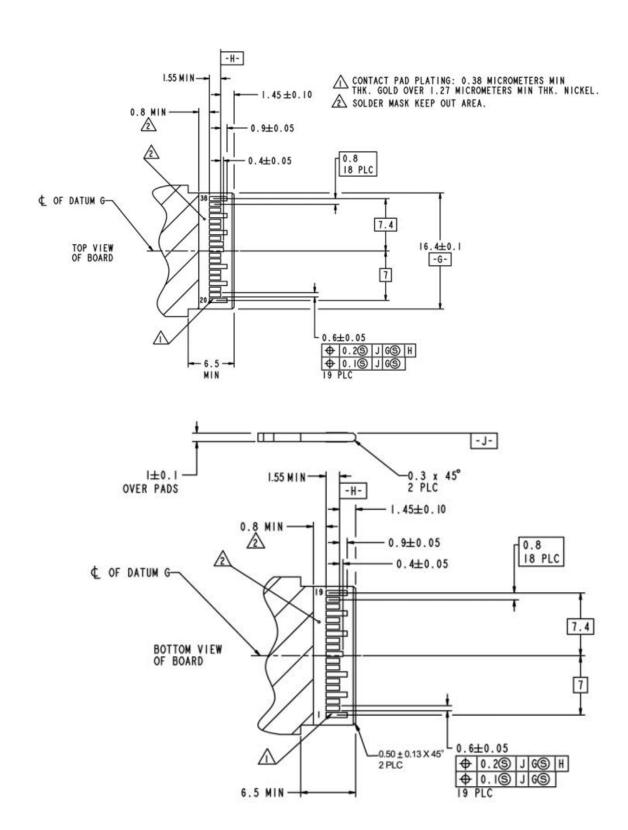

### **Electrical Interface**

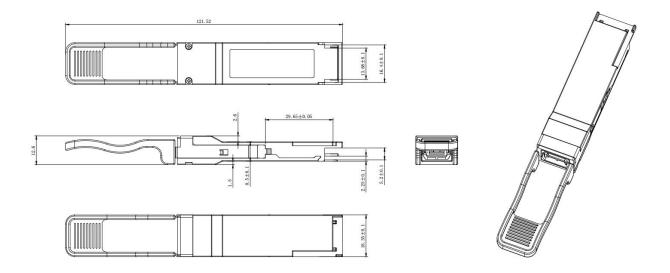

# **Recommended PCB Layout**

### **Mechanical Dimensions**

#### Notes:

- 1、Tolerance: +/-0.1mm.
- 2. Others according to SFF-8661 or customer spec.
- 3. Optical port according to fiber connector spec.

### **Warnings**

### **Handling Precautions:**

This device is susceptible to damage as a result of electrostatic discharge (ESD). A static free environment is highly recommended. Follow guidelines according to proper ESD procedures.

### **Laser Safety:**

Radiation emitted by laser devices can be dangerous to human eyes. Avoid eye exposure to direct or indirect radiation.
